

# 912 TV-SAT AND MODULATOR EQUIPMENT

## 912 BROADBAND AMPLIFIER

Code: 9120244

Model: **PA-721** 

### Description

Broadband amplifier for ALCAD equipment. It has one input to amplify the signal coming from all the modules of the installation, and a mutliplexing input for the rest of the channels of the installation. The output level can be controlled by means of an attenuator.

#### **Applications**

All MATV and SMATV installations where transmodulators or modulators are incorporated.

#### Characteristics

Amplifier with high output level, power stage with a hybrid amplifier.
