

# 913 MULTISWITCHES

## 17X50 CASCADABLE MULTISWITCH

Code : **9130187**

Model : **ML-401**

### Description

Cascable multiswitches for 16 polarities and terrestrial TV with 50 outputs. The outputs are amplified in the satellite IF band. In the terrestrial band they can be configured to function in either active or passive mode. Need to be powered from each individual receiver so that the switching and amplification of each derived output will function.

### Applications

Medium-sized collective satellite and terrestrial TV installations. It is essential that they be mounted along with end multiswitches, so as to obtain distributions of up to 100 outlets on a single line.

### Characteristics

Shielded metal chassis with plastic supports. F-type connectors. Earth.
