962 POWER SUPPLY

POWER SUPPLY LOCK HIGH POWER CONSUMPTION

Code : **9620013**

Model : **ALM-080**

Description

Power supply unit for electric door locks with high power consumption (12 Vac and up to 2A). In addition, it has two outputs to supply power to other equipment in the installation: one output of 12 Vac, the other of 15 Vdc. These outputs make it possible to replace either an ALA-040 or an ALM-040 used in the same installation. DIN 10-element rail format, for wall or rail mounting. The power supply unit is protected against short circuits.
