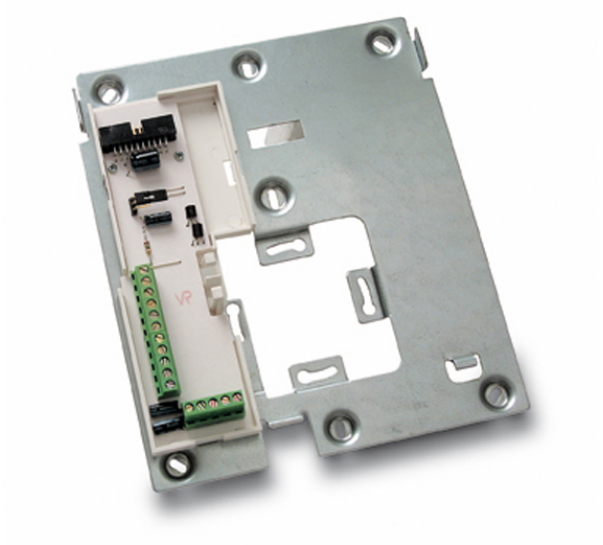
963 DOOR ENTRY SYSTEM MONITORS

CONNECTION BRACKET MONITOR 2-WIRE



Code : **9630025**

Model : **SCM-050**

Description

Element in which all the connections of the video door entry system of the dwelling are made, enabling the monitor to be connected to the rest of the installation. It can be fixed to a wall or to a standard electrical box. Support for wall fixing of the video door entry system monitor, for 2-wire video door entry systems. For the monitor and connection bracket to operate properly together, a code must be assigned to each connection bracket so that it can be identified within the installation (this is referred to as programming the connection bracket). The code is stored in the non-volatile memory of the connection bracket.
