## SENSORS AND ACTUATORS

---

### MOTION SENSOR

Code : **9410021**

Model : **SNS-030**

#### Description

SNS-030 is a low consumption professional passive IR sensor with an advanced microprocessed technology. When connected to a Room Post it allows to identify the place where the sensor has been activated. It has three positions for mounting: in vertical, on the wall or on the ceiling. It comprises a stylish casing and a white light filter. To be tested during the installation, it includes a selector for Test mode (TEST) that cancels the two minute waiting period to carry out the necessary tests.
