

941 SENSORS AND ACTUATORS

MOTION SENSOR

Code : **9410021**

Model : **SNS-030**

Description

SNS-030 is a low consumption professional pasive IR sensor with an advanced microprocessed technology. When connected to a Room Post it allows to identify the place where the sensor has been activated. It has three positions for mounting in vertical, on the wall or on the ceiling. It comprises a stylish casing and a white light filter. To be tested during the installation, it includes a selector for Test mode (TEST) that cancels the two minute waiting period to carry out the necessary tests.
