UNIDENTIFIED RECEIVER FOR 1 DOOR

Code : **9430052**

Model : **CER-025**

Description

CER-025 is the receiver station for radio messages coming from bracelets (CER-030) when the wanderer enters an area monitored by an activator (CER-010/CER-011). Once the message has been received, the station notifies its Wanderer Control Central associated the unit that a wanderer entered the monitored area. The receiver station includes a potential free contact (NO) that is closed as long as the wanderer remains in the monitored area, to be able to close a door, activate a siren, etc. This contact remains activated 30 seconds after the wanderer has left the area being monitored. The maximum distance between CER-025 and bracelet is 100 m outdoors. The maximum number of bracelets that can be registered to one CER-025 receiver is 500.
