944 SOFTWARE

ATICA MONITORING SOFTWARE

Code : **9440000**

Model : **SWG-010**

Description
Installed in the main server of the patient-nurse call system, the Monitoring software is a web application that provides an intuitive and easy-to-use interface for both the nursing team and the Hospital / Residency management team. It is of great help to the daily work of the nursing team since it allows a real time visualization of the calls made by the patients through the Room Terminals. It allows the documentation of calls and attentions provided by the nursing team so that they can be followed up with reports that include information such as the time elapsed until the call is answered or the reason for the call or attention.
