COMPACT TAP-OFF 4OUTPUTS&THROUGH.2-WIRE

Code : **9730102**

Model : **DIV-464**

Description

Accessorie for Door Entry System installations. Tap-off for 2-wire system, 4 tapped output and throughput. This makes it possible to tap the signal of the 2-wire system to the telephones/monitors connected to it, ensuring that the system works with optimal quality. With the DIV-061, you can connect 1 telephone/monitor. The DIV-464 allows you to connect up to 4 telephones/monitors. Power is supplied directly through the BUS, with no need for additional wires.

A compact tap-off, able to tap the signal of a 2-wire system to up to four telephones/monitors, while ensuring an optimum performance of the system. Power is fed via the bus, without any extra wires. Thanks to its small size, it can be housed inside a standard junction box, greatly facilitating the installation of the entrance panel.
