

900 TERRESTRIAL ANTENNAS

ANTENNA NEO, CHANNELS 21/48 REJ, G=18DB

Code : **9000201**

Model : **NEO-082**

Antenna for optimal reception of DTT channels, with the best available gain (18 dBi). Designed to cover the UHF band up to 694 MHz while rejecting 4G and 5G telephone bands thanks to its built-in rejection filter. Easy to mount and adjust, providing maximum robustness and ensuring complete safety of installation. Stylish design that reflects the excellent electrical and mechanical qualities of the antenna.

Applications

Digital and analogue terrestrial TV installations, collective or individual, where rejection of the LTE700 and LTE800 bands is necessary and high gain and directivity are required. The reflectors prevent interference produced by the signals received from the rear of the antenna.

Characteristics

Rejection of LTE700, LTE800 and GSM signals. Manufactured in aluminum, zamak, weather-resistant plastic and galvanised steel. Includes a matching transformer with built in rejection filter, with F-type connector, protected inside a watertight casing. No tools required for installation. Supplied in an individual pack.
