## UHF 21/48 LTE700 NEO BALUN

Code : **9010020**

Model : **SI-422**

Balun (symmetrizer) specially designed for NEO-08X and NEO-09X antennas. Designed to cover the UHF band up to 694 MHz while rejecting the LTE700 and LTE800 mobile telephone bands thanks to its built-in rejection filter. F-type connector that stays protected inside the balun box once the balun is installed. Fast and easy assembly, no tools required.

### Applications

Digital and analogue terrestrial TV installations, collective or individual, where a strong rejection of the LTE700 band is necessary. Conversion of non-LTE800 antennas or antenna without rejection filters into antennas with built-in LTE700 rejection filters.

### Characteristics

Rejection of LTE700, LTE800 and GSM signals.
