COMMUNICATION UNIT FOR VOICE CALL

Code : **9415043**

Model : **MIV-942**

The two-way communication module provides excellent voice communication in those places where it is required and thanks to its voice recognition and artificial intelligence system it is able to recognize calls for help and initiate calls to nurses and doctors without the need to make any kind of phone call. physical interaction with the module.

The MCA-xxx modules can be installed at multiple points and controlled by a single control terminal (CHC-401), which allows sensitive material to be moved away from the communicator installation point and to obtain a high degree of protection and security.

Alcad's communication module can be combined with other ACCURO or LIVERO elements to offer a complete ecosystem.
