941 SENSORS AND ACTUATORS

AUDIO COM. UNI. BUS DIN8 GREEN BLUE

Code : **9415031**

Model : **MCA-904**

Description:
RS-485 (bus) touch-operated bed unit with audio, two buttons (presence and code blue), two reassurance LEDs, one for each button, and a female DIN-8 connector compatible with LLC-75x call handsets. Easy to clean thanks to the antibacterial coating on its front panel. It provides voice communication, allows presence to be registered using the green button and a code blue to be activated using the corresponding button. The blue LED indicates the status of the code blue call.
The MCA-xxx modules can be installed at multiple points and managed from a single CHC-401 control unit, allowing sensitive equipment to be kept away from the communicator installation point and thereby increasing protection and security.

CÓDIGO	9415031
MODELO	MCA-904
DIMESIONES	75 x 120 x 45 mm
ALIMENTACION	24VDC
ACABADO	ABS
PULSADOR	Botón verde: presencia y cancelación Botón azul: Llamada doctor
