IPAL WIRELESS SENSOR FOR DOOR / WINDOW

Code : **9790010**

Model : **WSN-500**

Wireless RF window sensor, with red led, battery operated

Its great functionalities are not at odds with its sophistication: the range of digital home devices compatible with the IPAL system makes it possible to quickly and easily convert any home into a modern and elegant digital home: lighting control mechanisms, curtains and blinds; smoke or motion sensors; smart plugs and save energy. Its glass-like finish, in white, underlines a discreet design that combines with any decoration. The capacitive keyboard, by reducing the possibility of mechanical failure, prolongs its useful life while facilitating its cleaning.
