979 HOME AUTOMATION

1 IPAL WIRELESS SCENE CONTROL

Code : **9790006**

Model : **MEC-000**

The tactile scene control is made up of 4 buttons (home, out, A, B), each one programmable with the scenes we want.
Square device with a tough glass finish.

Its great functionalities are not at odds with its sophistication: the range of digital home devices compatible with the IPAL system makes it possible to quickly and easily convert any home into a modern and elegant digital home: lighting control mechanisms, curtains and blinds; smoke or motion sensors; smart plugs and save energy. Its glass-like finish, in white, underlines a discreet design that combines with any decoration. The capacitive keyboard, by reducing the possibility of mechanical breakdowns, prolongs its useful life while facilitating its cleaning.
