913 MULTISWITCHES

5X8 FINAL MULTISWITCH, EU PSU

Code : **9130300**

Model : **MB-0508**

Description
Final multiswitches for 4 polarities and terrestrial TV with 8 outputs. The outputs are amplified in the satellite IF band. Need to be powered from each individual receiver so that the switching and the amplification of each derived output will function correctly. The external power supply units provides the required voltage to the LNBs in order to work properly.

Applications
Medium-sized collective satellite and terrestrial TV installations. Installed individually, they can distribute up to 8 TV outlets. When combined with cascadable multiswitches, with intermediary amplifiers in place, it is possible to distribute to 64 outlets on a single line.

Characteristics
Shielded metal chassis with plastic supports. F-type connectors. Power supply connector is a 9.5 x 2.1 mm jack to feed the LNBs.
