

900 TERRESTRIAL ANTENNAS

UHF ANTENNA, CHANNELS 21/48, G = 15 DBI

Code : **9000105**

Model : **BU-267**

Description

Double array antennas covering the complete gain range. Designed to cover the UHF band up to 694 MHz while rejecting the LTE700 and LTE800 mobile telephone band. Fast and easy assembly, all the components are premounted and no tools are required for their assembly.

Applications

Digital and analogue terrestrial TV installations, collective or individual, where rejection of the LTE700 and LTE800 bands is necessary.

Characteristics

Rejection of LTE700, LTE800 and GSM signals as well as signals coming from the bottom of the antenna. Robust antenna with great resistance to both sun and saltpetre. Made from aluminium, weather-resistant plastic and galvanised steel. Elevation angle adjustment, mounting in either horizontal or vertical polarity. Includes a balun (symmetrizer), specially designed for the antenna, with F-type connector protected inside the balun box. Packed individually, in multiple packs or unassembled.
