

900

TERRESTRIAL ANTENNAS

UHF ANTENNA NEO CHANNELS 21/48, G = 16DB

Code: 9000189

Model: **NEO-047**

Antenna for optimal reception of DTT channels, with a high gain (16 dBi). Designed to cover the UHF band up to 694 MHz. No built-in LTE rejection filters. Easy to mount and adjust, providing maximum robustness and ensuring complete safety of installation. Stylish design that reflects the excellent electrical and mechanical qualities of the antenna.

Applications

Digital and analogue terrestrial TV installations, collective or individual, where rejection of the LTE700 and LTE800 bands is performed with an external filter (not provided with this antenna) and high gain and directivity are required. The reflectors prevent interference produced by the signals received from the rear of the antenna.

Characteristics

Manufactured in aluminum, zamak, weather-resistant plastic and galvanised steel. Includes a matching transformer with F-type connector, protected inside a watertight casing (IP55). No tools required for installation. Supplied in an individual pack.
