

905 MODULAR AMPLIFICATION EQUIPMENT

PROGRAMMABLE DOUBLE FILTER DTT UHF

Code : **9050126**

Model : **ZA-411**

Description

Double programmable selective filter: each module filters two adjacent channels or groups of channels. Each filter is individually programmed to be set to one channel or one group of two to six channels. The level of the channels can be adjusted automatically or manually from the broadband amplifier of the equipment.

Applications

Medium-sized and large digital and analogue terrestrial MATV installations. For use in areas where reception is difficult, with considerable differences in level between the channels. Normally the channel group filtering is used with one analogue channel next to several digital channels.

Characteristics

Filters programmable by channel or filter. Automatic gain adjustment. Filters remain highly stable in spite of variations in temperature. Automatic power supply from preamplifiers with protection against short circuits.
