

905 MODULAR AMPLIFICATION EQUIPMENT

ZA SYSTEM WITH 3XZA-411, PA-320 & ZF-712

Code : **9050175**

Model : **ZA-913**

Description

Programmable amplifier system, with three programmable filter modules, broadband amplifier, IF satellite amplifier and power supply. A complete and fully assembled system will be supplied. The system has six programmable filters, amplifier for the filters, band III and FM amplifier, and satellite IF amplifier. Each filter is individually programmed to be set to one channel or one group of two to six channels. The level of the channels can be adjusted automatically or manually from the broadband amplifier of the equipment.

Applications

Medium-sized and large digital and analogue terrestrial and satellite SMATV installations. For use in areas where reception is difficult, with considerable differences in level between the channels. Normally the channel group filtering is used with one analogue channel next to several digital channels.

Characteristics

Filters programmable by channel or filter. Automatic gain adjustment. Filters remain highly stable in spite of variations in temperature. Automatic power supply from preamplifiers with protection against short circuits.
