

907 OUTLETS AND USER ACCES POINTS

TERMINAL FILTERED OUTLET

Code : **9070121**

Model : **BS-130**

Description

Outlets for terrestrial and satellite TV with one IEC male and F female connectors. They cover frequencies up to 2,150 MHz. They have a DC path from the satellite output to the input.

Applications

Individual or SMATV installations. Installation as a terminal outlet connected to a tap-off or splitter. They permit the feeding of an LNB through the output. A control voltage can be used in installations with multiswitches.

Characteristics

Shielded zamak chassis. Connection of the coaxial cable by means of screw terminal.
