

IPAL: THE SYSTEM THAT ADAPTS TO YOUR LIFESTYLE

IPAL is the smart home and access control system that adapts to your lifestyle. Just as if you were on the sofa, with your mobile phone you can control—at any time and any place— who’s been to visit you in your absence. You can also program your home to so that you can find it to your liking on your return.

IPAL **combines a technologically advanced system with a very careful design** that will provide you with safety and comfort. Are you going to miss it?

Control your home wherever you are

EASILY MANAGE ALL FUNCTIONS WITH YOUR MOBILE PHONE

With **IPAL by ALCAD**, the free app available for Android and iOS, you can manage calls, door opening and home automation functions configured on the main monitor with your mobile phone, thanks to its connection to the Wi-Fi network. Just as if you were at home.

Kabi: take control of the whole system

The 7 and 10-inch **KABI** monitors with capacitive touch screen. Our indoor units are the heart of the entire IPAL system: their simple lines, alongside with their light tone, make it possible to install them in any room, with quick access to all their functions thanks to their intuitive and simple menu. And to offer an even more real experience, KABI allows you to personalize rooms with a photo of the room with connected devices, assigning the necessary icons. (*)

More info

Home automation devices: intelligent and sophisticated

We have everything you need for your **smart home**: mechanisms to control lighting or curtains; smoke or motion sensors; and smart plugs that save energy. Its glass-like finish, in white, will add a touch of **design and sophistication** to your decoration.

Triple switch touch buttons

INTELLIGENT THERMOSTAT

The IPAL digital wireless boiler thermostat saves energy, customizing the temperature of a room according to the hours of the day, even remotely through the **IPALTherm** app (available for Android and iOS).

Door/window wireless sensor

Intelligent plug

Wireless smoke sensor

Avant-garde style video intercoms

Miru and **Eider** street panels will be the first thing your visitors see. For this reason, we have conceived two video intercoms with an avant-garde style that stand out for their **robustness and elegance**.

And if you hate carrying your keys at all hours, don't worry: they incorporate the **iACCESS** access control system using an electronic key.

MIRU
Glass-like finish with a capacitive keypad.

EIDER
Vandalproof street panel that combines a glass-like finish with an aluminum chassis.

IPAL KIT: PERFECT FOR SMALL INSTALLATIONS

The IPAL kit has everything you need to **transform a small installation into a powerful intelligent home**, including an anti-vandal entrance panel with a push button and RFID access control.

It is ready to add all the devices and sensors from the IPAL catalogue, making it an ideal option for **single-family houses and offices**.
